

## MPT® Cooler

*All-season automotive cooling system additive*

MPT Cooler removes hot spots or air pockets to decrease coolant temperatures up to 20°F. Can be used with or without antifreeze in 3-5 gallon systems. Compatible with all types of antifreeze including Dex-Cool and long-life products. Improves heat transfer in ethylene and propylene glycol systems while reducing cylinder head temperature and providing corrosion protection. Safe for use in all cooling systems including cast iron, aluminum, bronze, and copper. Will not lower temperature below thermostat setting. Biodegradable, non-toxic and pH neutral.

- *Removes hot spots caused by air pockets or bubbles, while reducing scaling.*
- *Provides rust and corrosion protection – meets requirements of ASTM D2570 and ASTM D1384 corrosion tests.*
- *Safely add to antifreeze (including DEX-COOL and long life products) or add to water alone – ideal for race cars.*
- *Extends engine life by reducing cylinder head temperature and maintaining the optimal temperature range more quickly.*
- *Biodegradable formula is non-toxic and environmentally friendly.*
- *Improves fuel mileage and performance while increasing air conditioning efficiency.*
- *Safe for use with all types of radiators, hoses, accessories and components.*
- *Will not reduce cooling system temperature below the thermostat setting.*

**Dosage:** Add one bottle per 12-20 quart cooling system. Systems approaching the 20 quart level or greater may require a second bottle.
